

Project Information Sheet

South Willamette Street Improvements

Project Overview:

- This work is from 23rd Avenue to 600 feet south of 29th Avenue and is in the Friendly area Neighborhood.
- This work is mainly striping and traffic signal changes.
- Work will also include reconstructing sidewalk access ramps as needed to comply with the Americans with Disabilities Act.
- This project is primarily intended to increase access through the corridor, but the full scope of the work is not yet determined and additional elements may be added as the site is further reviewed.

Construction Schedule:

- This project is scheduled for construction in the spring of 2016.
- Prior to the start of street construction, the City's arborists may be on-site trimming trees to prevent overhead limbs from being damaged by construction equipment.
- Also prior to construction, utility companies (water, electricity, gas) may be on-site adjusting their facilities in order to avoid conflicts with the work and prevent damage to their facilities.

Traffic Impacts:

- Drivers should expect lane closures and lane shifts during construction.
- Pedestrians should expect sidewalk detours during the sidewalk ramp work at the intersections.
- Bicyclists should expect to merge with motor vehicle traffic depending on available lane widths during construction.
- With any construction, drivers should expect equipment and workers in the roadway leading to congestion and delays during the work.

Project Funding:

- The major source of funding is Transportation System Development Charges.

For More Information:

- Project Manager: Chuck Mueller, phone 541-682-6854, chuck.w.mueller@ci.eugene.or.us.
- Transportation Planning Engineer: Chris Henry, 541-882-8472, chris.c.henry@ci.eugene.or.us
